

GREENBLOCK HOMES OFFERS THE NEXT GENERATION IN BUILDING TECHNOLOGY

Greenblock's reputation as the "toughest block in the industry" derives from its design origins in Europe over 50 years ago. Homes constructed with Greenblock ICF's may look ordinary, but look beneath the surface and you'll see why our walls are far superior to stick or concrete block structures:

- **The most energy efficient & strongest building solution on the market today**
- **Hurricane resistant**
- **Mold resistant**
- **Sound resistant-50% better than CBS**
- **Disaster resistant**
- **Fire resistant**
- **Termite & Pest resistant**
- **Estimated savings of 50-70% in cooling and heating**
- **Extends your HVAC life**
- **Better air quality – Reduce allergy with HEPA filter**
- **Estimated 8% higher value when you sell over CBS construction**

The ORIGINAL ICF COMPANY since 1967! Greenblock walls offer expandable polystyrene foam provides superior protection against extreme events like earthquakes, hurricanes and tornados because they are built with solid steel reinforced concrete...the strongest building materials you can use. Greenblock walls also provide a quiet sanctuary for their occupants achieving a Sound Transmission Classification of 50 or higher, virtually eliminating outdoor noise such as traffic and airplanes.

GREENBLOCK is the ORIGINAL manufacturer of high-performance Insulated Concrete Form wall systems. ICFs are stay-in-place foam forms for poured, steel-reinforced concrete walls. This code approved method creates a stronger, quieter, safer and more energy efficient wall than traditional building technologies. Home and building owners benefit from substantially lower utility bills, protection from natural disasters and healthier indoor air quality.

Greenblock provides home owners the most energy efficient, strongest, mold, fire, termite and disaster resistant building solution in the market today!
